#### Item selection

When a user is browsing an item or service.

Upload

#### Pre-purchase screen

When a user is ultimately ready to make a purchase.

Upload

## 7. Please upload screenshots of your buyflow integrated with Google Pay API for approval.

The screenshot shows the Google Pay API setup interface. On the left is a navigation menu with options: Dashboard, Business Profile, Google Pay API (selected), Users, Contact support, and Send feedback. The main content area is titled 'Screenshots of your buyflow' and contains instructions: 'Upload screenshots (1MB max) of your buyflow integrated with the Google Pay API. Your buyflow must be reviewed and approved before you're given full production access. If you need to, you can save your progress and come back at a later time.' Below the instructions is a link for 'View examples'. There are five rows, each with a placeholder icon, a title, a description, and an 'Upload' button:

- Item selection**: When a user is browsing an item or service.
- Pre-purchase screen**: When a user is ultimately ready to make a purchase.
- Payment method screen**: When a user selects Google Pay as their payment method.
- Google Pay API payment screen**: When a user is shown the payment info they've saved to Google Pay. Tip: Android won't allow you to take a screenshot of this screen, so take a picture of the screen using another device.
- Post-purchase screen**: When a user has made a successful purchase.

At the bottom left, there are links for 'Google Pay's Business Console', 'Additional Terms of Service', 'Privacy Business Policies', 'Google Pay API', 'Terms of Service', and 'Acceptable Use Policy'.

## 8. Click "Submit for approval" after you have completed all the steps above.

The screenshot shows the 'Web integration' page. The left navigation menu is the same as in the previous screenshot. The main content area is titled 'Web integration' and contains a message: 'Integration is not ready to submit. Please complete the form to submit your application for approval.' A 'Submit for approval' button is highlighted with a red box. Below this is a form with two sections:

- Your website**: Enter the domain you'd like to integrate with. The domain needs to be verified, secured (HTTPS) and include the full path of labels up to the DNS root. For example, www.example.com, not example.com. A text input field contains 'www.google.com'.
- Your Google Pay API integration type**: Select how you'd like to integrate with the Google Pay API. If you use one of our supported Payment Service Providers (PSPs), choose "Gateway". If not, choose "Direct" as your integration type. A dropdown menu is set to 'Gateway'.

At the bottom, there is a section for 'Screenshots of your buyflow' with the same instructions as in the previous screenshot.

\* After you have completed all the application flow, please wait for the reply from Google Pay Team. It may take around 1 week. If you have any further question, you can also contact TapPay Support Group([support@cherri.tech](mailto:support@cherri.tech)).
